

Creating a campus-wide ecosystem and career-ready education.

Riipen’s Career Connected Campus provides institutions with a uniquely scalable and integrated work-based learning ecosystem, one that guides students from early skill awareness to advanced, employer-validated experience.

The challenge.

Fewer than **50% of learners** seeking an internship secure one. Of those placed, only **two-thirds report** having a high-quality experience.*

Students are seeking clearer, more meaningful pathways to careers, while institutions are navigating the challenge of scaling experiential learning in ways that are both equitable and high quality.

The Riipen solution.

Riipen’s Career Connected Campus equips institutions to deliver a **seamless progression of experiential learning** across the entire student journey.

It connects early exploration, skill development, and advanced industry engagement into one scalable, high-quality ecosystem.

Work-based learning engine

Riipen provides a scalable work-based learning infrastructure that delivers high-quality, career-aligned experiences across the student journey, from early skill-building to advanced applied projects. Through guided experience design, built-in assessments, and platform tools that support consistency, collaboration, and progress tracking, institutions can deliver experiential learning at scale without sacrificing quality.

Industry partners

Institutional intelligence

Riipen provides a centralized analytics and insights layer that supports strategic decision-making, accreditation, and student success.

By consolidating experiential learning data into a single reporting system, institutions gain clear evidence of skills development, employer alignment, and workforce outcomes to inform curriculum, advising, and funding decisions.

Unlocking institutional value through flexible and scalable experiential learning.

Riipen is a work-based learning platform that helps institutions deliver high-quality, employer-connected learning at scale, with the infrastructure, partnerships, and intelligence to support student success and workforce alignment.

Recruitment & enrollment

- Deliver experiential learning to every student across programs and years — signaling a compelling, modernized value proposition to prospective students and families.
- Differentiate the institution with a signature, career-connected experience that aligns directly with NACE expectations for high-impact practices.

Student success & retention

- Embed durable, NACE-aligned skills development across the curriculum, boosting student confidence, engagement, and persistence.
- Provide equitable access to real-world learning regardless of background, network, or prior work experience.

Employment outcomes & institutional reputation

- Strengthen employability pathways through streamlined employer sourcing and industry engagement — reducing administrative burden while expanding partnership reach.
- Ensure graduates demonstrate the competencies employers value most, improving placement rates and institutional brand equity.

Intelligence & impact

- A consolidated experiential learning dashboard supports accreditation, program review, strategic planning, and data-driven decision making.
- Track skills development, employer feedback, NACE competency alignment, and WIL quality measures across all experiences.

Scalable, sustainable infrastructure

- Access structured, plug-and-play experiential models that lower barriers to integration and accelerate adoption.
- Build a long-term, sustainable WIL infrastructure that grows year after year — without relying on manual sourcing or fragmented support models.
